

PoDIUM Communication View

PoDIUM Webinar
November, 30th 2023

Prof. Dr.-Ing. Amr Rizk
University of Duisburg-Essen

Essen, 30.11.2023

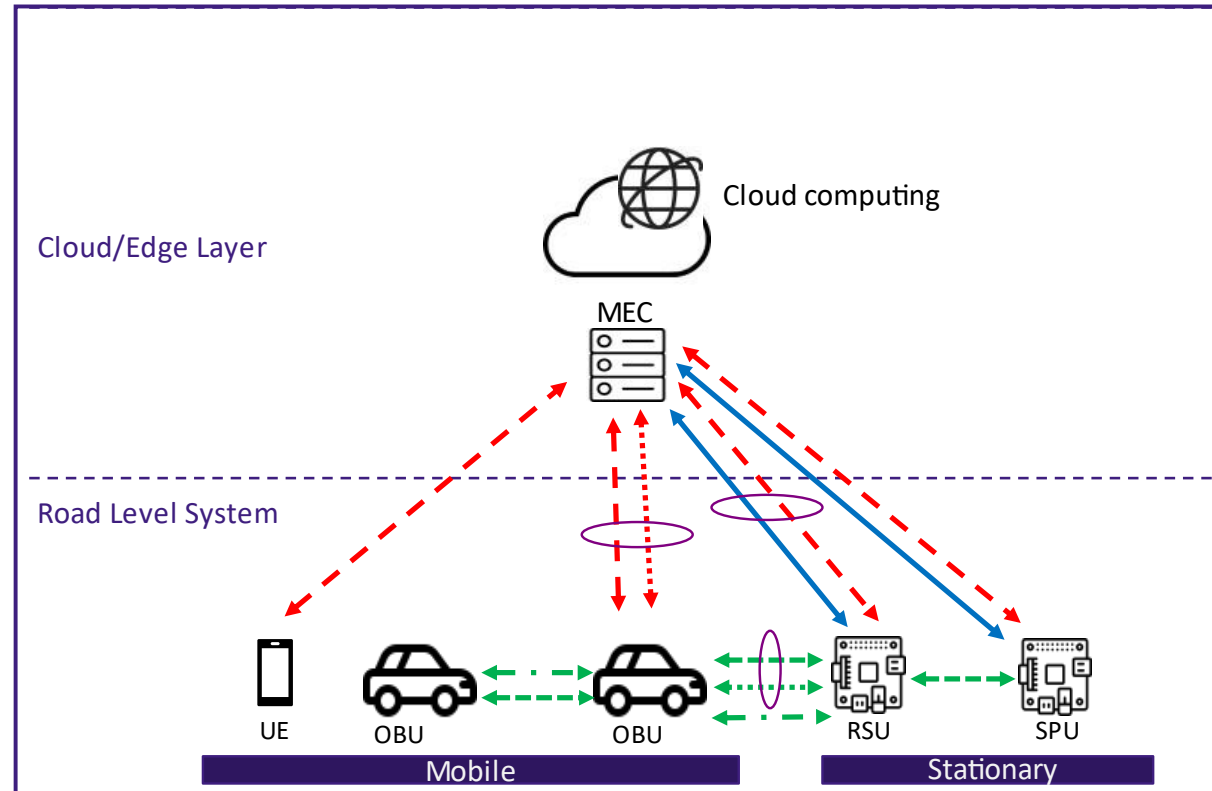

Co-funded by
the European Union

Communication Architecture Overview

- Integration of mobile road-users and stationary road-side equipment via:
 - ITS-G5
 - Cellular mobile networks (5G) with cm-wave and mm-wave cells
 - Sidelink
 - 60-GHz-WiFi
 - Wired connections
- Redundancy of multi-connectivity for
 - enhanced bandwidth
 - enhanced reliability

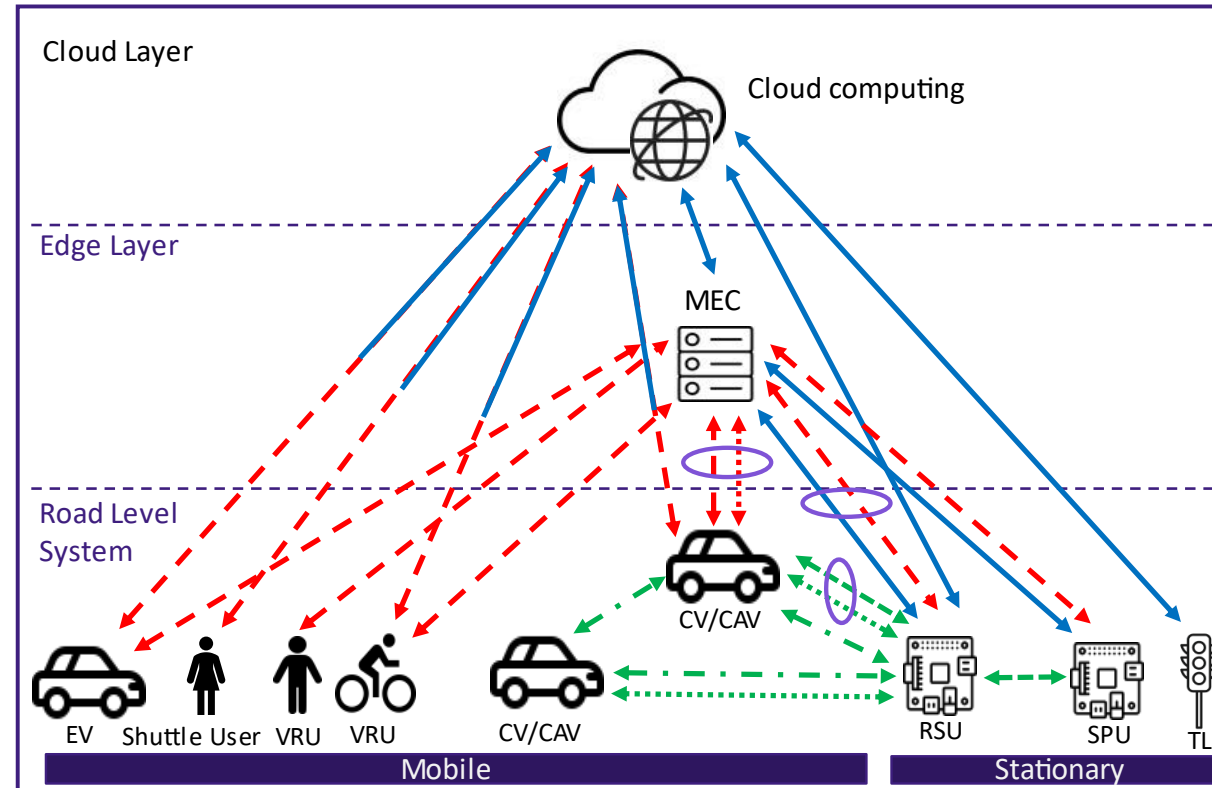

Communication technologies:

- Wired
- Cellular
 - cm-Wave
 - mm-Wave
- Ad-hoc
 - 60GHz WLAN
 - ITS-G5
 - SL (PC5)
- Multi-connectivity
- UE={EV, VRU, Shuttle user}

Platform Communication Architecture: A detailed view

Representation segregated into

- Levels of Communication
- Communication Technologies
- Types of Communication

Communication technologies:

- Wired
- Cellular
 - cm-Wave
 - mm-Wave
- Ad-hoc
 - 60GHz WLAN
 - ITS-G5
 - SL (PC5)
- Multi-connectivity

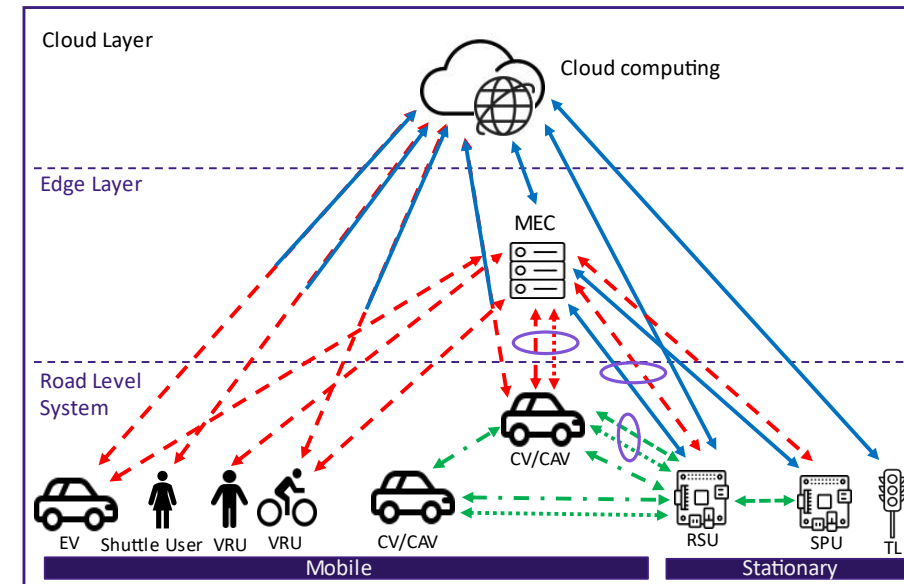

Levels of Communication

Road Level

- User Equipment (UE) (cm-Wave communication)
- On-Board Unit (OBU) (cm-Wave, optionally mm-Wave)
- Road Side Unit (RSU)
- Sensor Processing Units (SPU)

Cloud/Edge Level

- Multi-access Edge Computing
- Cloud Computing

Communication Technologies

Cellular network communication

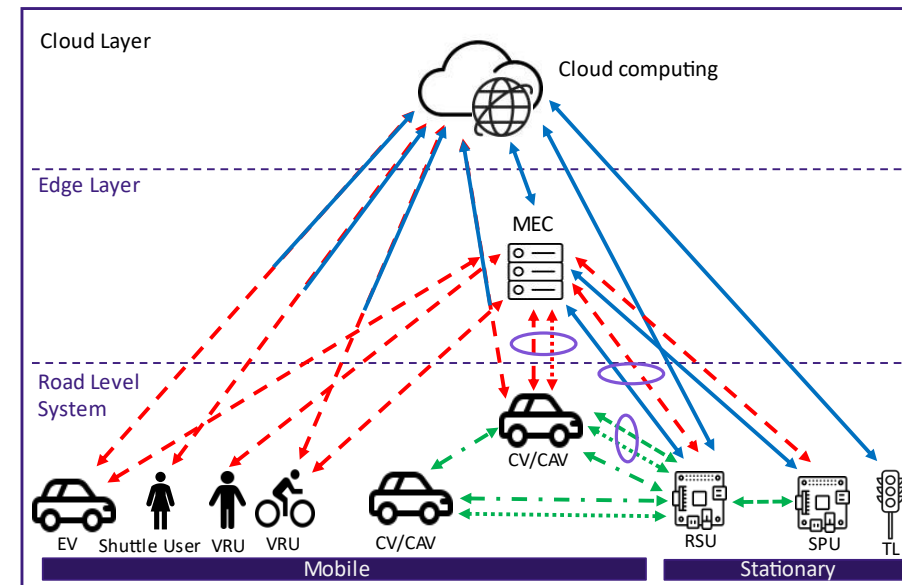

- 5G cm-Wave (FR1)
- 5G mm-Wave (FR2)

Ad-hoc wireless network communication (restricted local comm.)

- 60 GHz WLAN (IEEE 802.11ad)
- ITS-G5
- SL (PC5)

Wired Communication

- for the fixed parts, e.g. between RSU and MEC or to the cloud

Types of Communication

Single-Connectivity

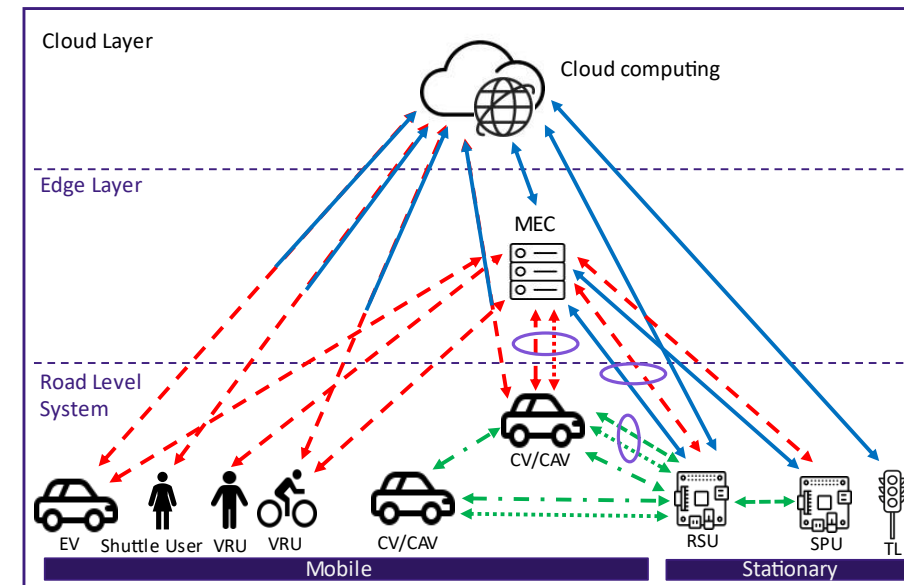

- using only a single technology btw. end-points

Multi-Connectivity

- between devices that can use multiple technologies simultaneously
- includes the ability to schedule messages and data packets over the available communication technologies
- for reliability, availability and redundancy in addition to latency reduction

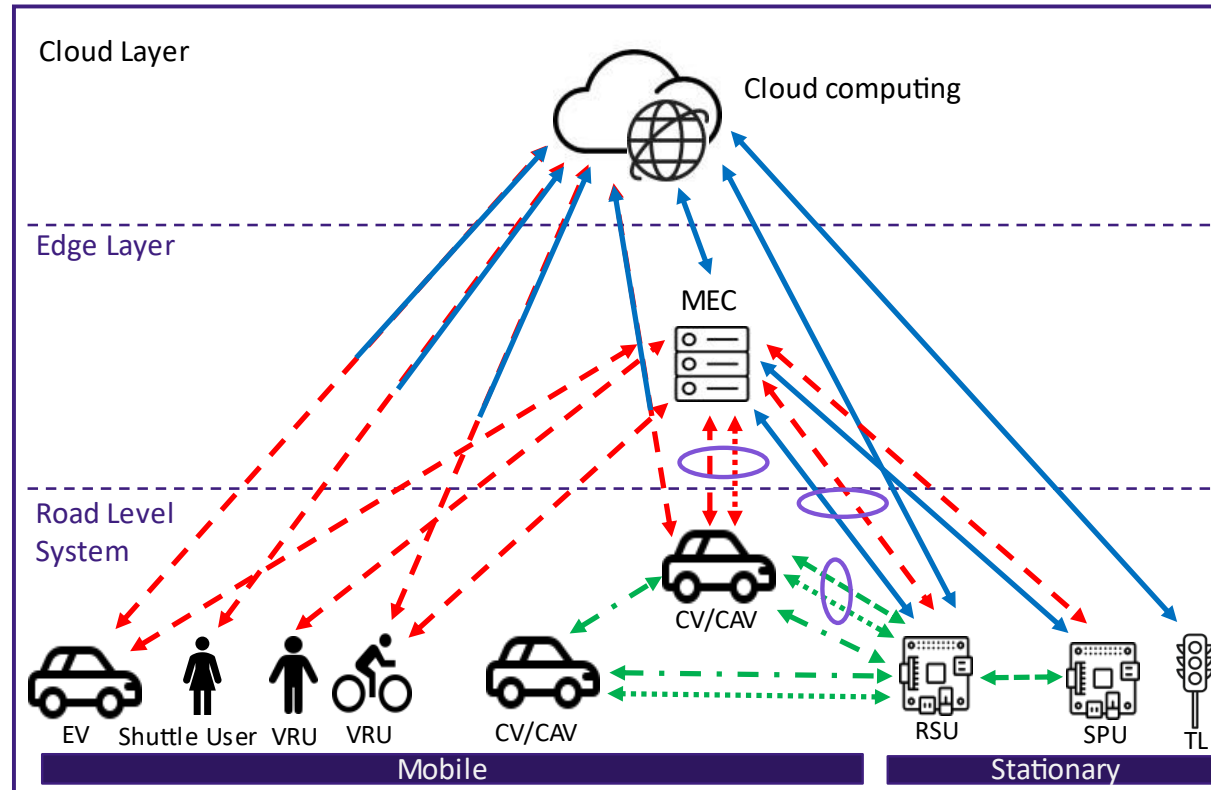

Hybrid Communication

- messages are simultaneously transmitted over all available communication technologies (always duplicated)
- redundancy decoupled from message-specific criticality

Platform Communication Architecture: A granular view

- Edge Layer applies MEC
- Cloud Layer (storage/compute) connectivity over the Internet
- OBUs deployed @
 - CV, CAV, EV
- UE @
 - Vulnerable Road Users (VRU)
 - Shuttle users
- Other Stationary comm. devices
 - Traffic light

Communication technologies:

- Wired
- Cellular
 - cm-Wave
 - mm-Wave
- Ad-hoc
 - 60GHz WLAN
 - ITS-G5
 - SL (PC5)
- Multi-connectivity

Thank you!
